The Archaeology of Roman Britain: Biography and Identity (Routledge Studies in Archaeology) Adam Rogers

Within the colonial history of the British Empire there are difficulties in reconstructing the lives of people that came from very different traditions of experience. *The Archaeology of Roman Britain* argues that a similar critical approach to the lives of people in Roman Britain needs to be developed, not only for the study of the local population but also those coming into Britain from elsewhere in the Empire who developed distinctive colonial lives. This critical, biographical approach can be extended and applied to places, structures, and things which developed in these provincial contexts as they were used and experienced over time. This book uniquely combines the study of all of these elements to access the character of Roman Britain and the lives, experiences, and identities of people living there through four centuries of occupation.

Drawing on the concept of the biography and using it as an analytical tool, author Adam Rogers situates the archaeological material of Roman Britain within the within the political, geographical, and temporal context of the Roman Empire. This study will be of interest to scholars of Roman archaeology, as well as those working in biographical themes, issues of colonialism, identity, ancient history, and classics.
