**Education in a Narcissistic Nation: Build Foundations for Students, Not Pedestals** Karen Brackman, Chad Mason

In their first edition, authors Chad Mason and Karen Brackman examined and explained the difficulties associated with attempting to successfully educate today's, often, over-indulged and narcissistic student population. The proliferation of narcissistic tendencies had consequences reaching every aspect of the educational environment from student achievement to the spate of school shootings across the United States. Included in the original edition were signs to observe of narcissistic traits and steps educators could take to alleviate the negative repercussions of students exhibiting those tendencies.

The second edition not only reviews many of those same aspects from the first edition but seeks to add additional information based on further research, additional observations of contemporary incidents across the United States, and updated strategies educators can utilize when faced with over-indulged and narcissistic students who affect their already busy and difficult educational tasks. New material includes a greater in-depth examination into the history and growth of narcissism in the United States, the state and federal government's roles in fueling the narcissistic fire, and additional material regarding social media's role and how to effectively navigate that medium when educating students.

This is a must-read book for all educators who work with today's 'me-driven' society and parent population. In an easy-to-read format, Mason and Brackman zero in on the problem, describe the consequences for failing to act, and provide practical solutions for those individuals in the educational trenches.
