Introducing LISREL: A Guide for the Uninitiated (Introducing Statistical Methods series) Adamantios Diamantopoulos, Judy A Siguaw

‘If you encounter a research student for whom the very word LISREL induces feelings of fear, quietly recommend that they read this book. They will thank you for it. With increasingly user-friendly versions of LISREL being released and guide books such as this published, LISREL really should be accessible to all’ - *European Journal of Marketing*

Emphasizing substantive issues rather than intricate statistical details, this book provides a comprehensive introduction to LISREL for structural equation modeling (SEM) using a non-technical, user-oriented approach that. The emphasis is on:

- exposing the reader to the major steps associated with the formulation and testing of a model under the LISREL framework

- describing the key decisions associated with each step

- highlighting potential problems and limitations associated with LISREL modeling

- assisting the interpretation of LISREL input and output files.

The overall aim is to provide a critical understanding of what is really involved in LISREL modeling and sensitize the reader against ‘mechanically’ fitting or modifying models.

The entire range of decisions associated with the practical application of the LISREL program is covered in a user-friendly fashion. Concrete examples are used throughout to illustrate issues relating to model conceptualization, specification, identification, estimation, evaluation, modification, and cross-validation and illustrated with actual program output.

The program is made much more accessible by adopting the more user-friendly SIMPLIS command language for preparing input files. Although primarily aimed at beginning users, readers are directed to further reading together with a comprehensive bibliography for the more advanced user.

From reader reviews:

Michele Stein:

Now a day people who Living in the era where everything reachable by interact with the internet and the resources within it can be true or not involve people to be aware of each facts they get. How individuals to be smart in having any information nowadays? Of course the correct answer is reading a book. Reading a book can help folks out of this uncertainty Information specially this Introducing LISREL: A Guide for the Uninitiated (Introducing Statistical Methods series) book as this book offers you rich information and knowledge. Of course the knowledge in this book hundred per cent guarantees there is no doubt in it everybody knows.

Sharon Wilson:

Reading a book tends to be new life style in this particular era globalization. With studying you can get a lot of information that can give you benefit in your life. Along with book everyone in this world can share their idea. Books can also inspire a lot of people. Plenty of author can inspire their own reader with their story or even their experience. Not only the story that share in the textbooks. But also they write about the information about something that you need example. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors on this planet always try to improve their ability in writing, they also doing some research before they write to their book. One of them is this Introducing LISREL: A Guide for the Uninitiated (Introducing Statistical Methods series).

Jodie Kahl:

Reading a book for being new life style in this season; every people loves to read a book. When you study a book you can get a great deal of benefit. When you read books, you can improve your knowledge, due to the fact book has a lot of information on it. The information that you will get depend on what kinds of book that you have read. In order to get information about your research, you can read education books, but if you want to entertain yourself look for a fiction books, this sort of us novel, comics, and soon. The Introducing LISREL: A Guide for the Uninitiated (Introducing Statistical Methods series) provide you with a new experience in studying a book.

Dana Barker:

As a pupil exactly feel bored to help reading. If their teacher expected them to go to the library as well as to make summary for some publication, they are complained. Just small students that has reading's heart and soul or real their hobby. They just do what the professor want, like asked to go to the library. They go to generally there but nothing reading significantly. Any students feel that reading through is not important, boring and can't see colorful photos on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore , this Introducing LISREL: A Guide for the Uninitiated (Introducing

Statistical Methods series) can make you sense more interested to read.
