Exploring Probability in School: 40 (Mathematics Education Library) Graham A. (Ed.) Jones

Exploring Probability in School provides a new perspective into research on the teaching and learning of probability. It creates this perspective by recognizing and analysing the special challenges faced by teachers and learners in contemporary classrooms where probability has recently become a mainstream part of the curriculum from early childhood through high school. The authors of the book discuss the nature of probability, look at the meaning of probabilistic literacy, and examine student access to powerful ideas in probability during the elementary, middle, and high school years. Moreover, they assemble and analyse research-based pedagogical knowledge for teachers that can enhance the learning of probability throughout these school years. With the book's rich application of probability research to classroom practice, it will not only be essential reading for researchers and graduate students involved in probability education; it will also capture the interest of educational policy makers, curriculum personnel, teacher educators, and teachers.

From reader reviews:

Edward Payne:

A lot of people always spent their particular free time to vacation or go to the outside with them family or their friend. Do you realize? Many a lot of people spent they will free time just watching TV, or playing video games all day long. In order to try to find a new activity honestly, that is look different you can read a book. It is really fun for you personally. If you enjoy the book that you just read you can spent the entire day to reading a reserve. The book Exploring Probability in School: 40 (Mathematics Education Library) it doesn't matter what good to read. There are a lot of folks that recommended this book. These folks were enjoying reading this book. In the event you did not have enough space to create this book you can buy often the e-book. You can m0ore quickly to read this book out of your smart phone. The price is not too costly but this book provides high quality.

Geraldine Davis:

Reading can called imagination hangout, why? Because if you find yourself reading a book specially book entitled Exploring Probability in School: 40 (Mathematics Education Library) your thoughts will drift away trough every dimension, wandering in every single aspect that maybe not known for but surely can become your mind friends. Imaging every single word written in a reserve then become one application form conclusion and explanation that maybe you never get ahead of. The Exploring Probability in School: 40 (Mathematics Education Library) giving you one more experience more than blown away your mind but also giving you useful information for your better life on this era. So now let us show you the relaxing pattern is your body and mind will likely be pleased when you are finished studying it, like winning an activity. Do you want to try this extraordinary paying spare time activity?

Judith Judd:

As a pupil exactly feel bored to reading. If their teacher inquired them to go to the library as well as to make summary for some e-book, they are complained. Just little students that has reading's spirit or real their hobby. They just do what the professor want, like asked to the library. They go to generally there but nothing reading really. Any students feel that reading is not important, boring and can't see colorful images on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Exploring Probability in School: 40 (Mathematics Education Library) can make you sense more interested to read.

Antonio Ritchie:

What is your hobby? Have you heard in which question when you got learners? We believe that that issue was given by teacher on their students. Many kinds of hobby, All people has different hobby. And you know that little person like reading or as looking at become their hobby. You need to know that reading is very

important and also book as to be the thing. Book is important thing to increase you knowledge, except your teacher or lecturer. You get good news or update about something by book. Different categories of books that can you decide to try be your object. One of them is actually Exploring Probability in School: 40 (Mathematics Education Library).
