## **Distributed Detection and Data Fusion (Signal Processing & Digital Filtering)** Pramod K. Varshney

This book provides an introductory treatment of the fundamentals of decision-making in a distributed framework. Classical detection theory assumes that complete observations are available at a central processor for decision-making. More recently, many applications have been identified in which observations are processed in a distributed manner and decisions are made at the distributed processors, or processed data (compressed observations) are conveyed to a fusion center that makes the global decision. Conventional detection theory has been extended so that it can deal with such distributed detection problems. A unified treatment of recent advances in this new branch of statistical decision theory is presented. Distributed detection under different formulations and for a variety of detection network topologies is discussed. This material is not available in any other book and has appeared relatively recently in technical journals. The level of presentation is such that the book can be used as a graduate-level textbook. Numerous examples are presented throughout the book. It is assumed that the reader has been exposed to detection theory. The book will also serve as a useful reference for practicing engineers and researchers. I have actively pursued research on distributed detection and data fusion over the last decade, which ultimately interested me in writing this book. Many individuals have played a key role in the completion of this book.

### **From reader reviews:**

#### **Susan Parker:**

In this 21st centuries, people become competitive in most way. By being competitive right now, people have do something to make these individuals survives, being in the middle of the actual crowded place and notice simply by surrounding. One thing that at times many people have underestimated the idea for a while is reading. Yeah, by reading a book your ability to survive raise then having chance to stand up than other is high. For you who want to start reading the book, we give you that Distributed Detection and Data Fusion (Signal Processing & Digital Filtering) book as starter and daily reading publication. Why, because this book is usually more than just a book.

#### **Oliver Gerling:**

Often the book Distributed Detection and Data Fusion (Signal Processing & Digital Filtering) will bring one to the new experience of reading a book. The author style to clarify the idea is very unique. Should you try to find new book to see, this book very suitable to you. The book Distributed Detection and Data Fusion (Signal Processing & Digital Filtering) is much recommended to you you just read. You can also get the e-book from the official web site, so you can quickly to read the book.

#### **Terry Klatt:**

Do you have something that you prefer such as book? The e-book lovers usually prefer to pick book like comic, brief story and the biggest an example may be novel. Now, why not trying Distributed Detection and Data Fusion (Signal Processing & Digital Filtering) that give your pleasure preference will be satisfied by simply reading this book. Reading addiction all over the world can be said as the means for people to know world a great deal better then how they react when it comes to the world. It can't be said constantly that reading addiction only for the geeky man but for all of you who wants to always be success person. So , for all of you who want to start reading through as your good habit, you are able to pick Distributed Detection and Data Fusion (Signal Processing & Digital Filtering) become your own personal starter.

#### **Rena Campbell:**

Reading a book make you to get more knowledge as a result. You can take knowledge and information coming from a book. Book is prepared or printed or outlined from each source in which filled update of news. Within this modern era like right now, many ways to get information are available for an individual. From media social just like newspaper, magazines, science book, encyclopedia, reference book, new and comic. You can add your understanding by that book. Are you hip to spend your spare time to open your book? Or just in search of the Distributed Detection and Data Fusion (Signal Processing & Digital Filtering) when you essential it?
