National minorities and their behaviour have become a central topic in comparative politics in the last few decades. Using the relationship between the state of Israel and the Arab national minority as a case study, this book provides a thorough examination of minority nationalism and state-minority relations in Israel.

Placing the case of the Arab national minority in Israel within a comparative framework, the author analyses major debates taking place in the field of collective action, social movements, civil society and indigenous rights. He demonstrates the impact of the state regime on the political behaviours of the minorities, and sheds light on the similarities and differences between various types of minority nationalisms and the nature of the relationship such minorities could have with their states.

Drawing empirical and theoretical conclusions that contribute to studies of Israeli politics, political minorities, indigenous populations and conflict issues, this book will be a valuable reference for students and those in policy working on issues around Israeli politics, Palestinian politics and the broader Palestinian-Israeli conflict.
