Exploration: A Very Short Introduction (Very Short Introductions) Stewart A. Weaver

We live in an age of globalization on every conceivable level, but globalization has a deeper history than politicians and pundits often allow, and nothing is more significant to its history than exploration. Wherever trade or faith or empire followed, explorers usually led. Their motives were as many-sided and various as their actions; their legacies are contested and mixed. But none can doubt the significance of explorers to the making of the modern world.

For as long as human societies have existed, people have felt the urge to venture outside of them, either in search of other societies or in search of new land or adventure. *Exploration: A Very Short Introduction* surveys this quintessential human impulse, tracing it from pre-history to the present, from east to west around the globe, and from the depths of volcanoes to the expanses of space.

Focusing on the theme of exploration as encounter, Stewart Weaver discusses the Polynesians in the Pacific, the Norse in the Atlantic, and other early explorers. He reflects on the Columbian "discovery" of the Americas, James Cook and the place of exploration in the Enlightenment, and Alexander von Humboldt's epochal encounter with tropical South America. The book's final chapters relate exploration to imperial expansion in Africa and Central Asia, assess the meaning of the race to the North and South Poles, and consider the significance of today's efforts in space and deep sea exploration.

But what accounts for this urge? Through this brief study of the history of exploration, Weaver clearly shows how the impulse to explore is also the foundation of the globalized world we inhabit today. Exploration combines a narration of explorers' daring feats with a wide-lens examination of what it fundamentally means to explore.

Not only by written or printed but in addition can you enjoy this book simply by e-book. In the modern era such as now, you just looking by your local mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your book. It is most important to arrange you to ultimately make your knowledge are still update. Let's try to choose proper ways for you.

Lisa Yang:

As a university student exactly feel bored in order to reading. If their teacher asked them to go to the library as well as to make summary for some e-book, they are complained. Just very little students that has reading's spirit or real their interest. They just do what the professor want, like asked to go to the library. They go to generally there but nothing reading very seriously. Any students feel that reading is not important, boring and also can't see colorful photos on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Exploration: A Very Short Introduction (Very Short Introductions) can make you really feel more interested to read.
