Autophagy: Chapter 4. Roles of Multiple Types of Autophagy in Neurodegenerative Diseases Tomohiro Kabuta, Yuuki Fujiwara, Keiji Wada

To date, three forms of autophagy – macroautophagy, microautophagy, and chaperone-mediated autophagy (CMA) – have been identified. Recently, we discovered a novel type of autophagy, “RNautophagy,” in which RNA is taken up directly into lysosomes for degradation. Gain of toxic functions of accumulated misfolded proteins or abnormal RNAs in CNS participate to a considerable degree in the pathogenesis of various neurodegenerative diseases. Thus, degradation and clearance of the toxic species by autophagy systems may be important for the maintenance of neurons and prevention of neurodegenerative diseases. We showed that amyotrophic lateral sclerosis (ALS)-linked mutant SOD1 is degraded not only by the proteasome but also by macroautophagy, and that macroautophagy reduces mutant SOD1-mediated toxicity. We found that Parkinson’s disease-associated mutant UCH-L1 interacts with LAMP-2A and Hsc70, which are the components of CMA machinery, and inhibits CMA. Because RNAs containing aberrant repeats are thought to cause some of ALS or spinocerebellar ataxia (SCA), RNautophagy may also play significant roles in the pathology of neurodegenerative diseases.

From reader reviews:

Eric Hough:

Information is provisions for those to get better life, information these days can get by anyone on everywhere. The information can be a expertise or any news even an issue. What people must be consider if those information which is from the former life are difficult to be find than now's taking seriously which one is suitable to believe or which one the actual resource are convinced. If you receive the unstable resource then you have it as your main information you will see huge disadvantage for you. All those possibilities will not happen throughout you if you take Autophagy: Chapter 4. Roles of Multiple Types of Autophagy in Neurodegenerative Diseases as the daily resource information.

David Wysocki:

The particular book Autophagy: Chapter 4. Roles of Multiple Types of Autophagy in Neurodegenerative Diseases will bring you to the new experience of reading a book. The author style to explain the idea is very unique. When you try to find new book you just read, this book very ideal to you. The book Autophagy: Chapter 4. Roles of Multiple Types of Autophagy in Neurodegenerative Diseases is much recommended to you to study. You can also get the e-book through the official web site, so you can quicker to read the book.

Donald Thomas:

People live in this new time of lifestyle always try and and must have the spare time or they will get large amount of stress from both daily life and work. So , if we ask do people have extra time, we will say absolutely sure. People is human not really a robot. Then we question again, what kind of activity are you experiencing when the spare time coming to an individual of course your answer will unlimited right. Then do you try this one, reading guides. It can be your alternative in spending your spare time, the book you have read is actually Autophagy: Chapter 4. Roles of Multiple Types of Autophagy in Neurodegenerative Diseases.

Robert Hill:

You may spend your free time to see this book this guide. This Autophagy: Chapter 4. Roles of Multiple Types of Autophagy in Neurodegenerative Diseases is simple to develop you can read it in the park your car, in the beach, train as well as soon. If you did not get much space to bring the actual printed book, you can buy the particular e-book. It is make you much easier to read it. You can save the book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.
