**Signal Processing of HDTV, V: Proceedings of the International Workshop on HDTV '93, Ottawa, Canada, October 26-28, 1993** L. Stenger, L. Chiariglione

In a world at the eve of digital television by satellite and cable, this publication provides a state-of-the-art exploration of the latest developments in HDTV technology. It highlights the technologies needed to launch HDTV from demonstration and trial status to that of a complete product and service. It also contributes towards the provision of the knowledge base required for the planning and management of the spectrum across the continents.

Papers are sourced from a wide range of international experts in the field, including those from Canada, where, according to L. Chiariglione, ... *An incredibly bold gamble, the progressive introduction of HDTV service on the [Canadian] terrestrial distribution network, additional to the existing TV service, has been proven to work and steps have been taken towards the full technical specification of the complete system.* This publication aims to have the dream of interactive television take a leap forward into reality.
