Introduction to Projective Geometry (Dover Books on Mathematics)

C. R. Wylie

Introduction to Projective Geometry (Dover Books on Mathematics) C. R. Wylie

This lucid introductory text offers both an analytic and an axiomatic approach to plane projective geometry. The analytic treatment builds and expands upon students' familiarity with elementary plane analytic geometry and provides a well-motivated approach to projective geometry. Subsequent chapters explore Euclidean and non-Euclidean geometry as specializations of the projective plane, revealing the existence of an infinite number of geometries, each Euclidean in nature but characterized by a different set of distance- and angle-measurement formulas. Outstanding pedagogical features include worked-through examples, introductions and summaries for each topic, and numerous theorems, proofs, and exercises that reinforce each chapter's precepts. Two helpful indexes conclude the text, along with answers to all odd-numbered exercises. In addition to its value to undergraduate students of mathematics, computer science, and secondary mathematics education, this volume provides an excellent reference for computer science professionals.

From reader reviews:

Gary Flint:

The book Introduction to Projective Geometry (Dover Books on Mathematics) can give more knowledge and information about everything you want. So why must we leave the great thing like a book Introduction to Projective Geometry (Dover Books on Mathematics)? A few of you have a different opinion about book. But one aim that will book can give many info for us. It is absolutely suitable. Right now, try to closer with the book. Knowledge or info that you take for that, you can give for each other; you are able to share all of these. Book Introduction to Projective Geometry (Dover Books on Mathematics) has simple shape however you know: it has great and large function for you. You can look the enormous world by open and read a publication. So it is very wonderful.

Adrian Rogers:

Now a day people that Living in the era everywhere everything reachable by interact with the internet and the resources within it can be true or not demand people to be aware of each data they get. How a lot more to be smart in receiving any information nowadays? Of course the correct answer is reading a book. Examining a book can help folks out of this uncertainty Information specially this Introduction to Projective Geometry (Dover Books on Mathematics) book because book offers you rich data and knowledge. Of course the knowledge in this book hundred % guarantees there is no doubt in it as you know.

Marina Espinal:

Playing with family inside a park, coming to see the coastal world or hanging out with pals is thing that usually you might have done when you have spare time, subsequently why you don't try matter that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love Introduction to Projective Geometry (Dover Books on Mathematics), you are able to enjoy both. It is excellent combination right, you still need to miss it? What kind of hang-out type is it? Oh can happen its mind hangout people. What? Still don't get it, oh come on its identified as reading friends.

John Smith:

A number of people said that they feel bored when they reading a guide. They are directly felt the item when they get a half parts of the book. You can choose the book Introduction to Projective Geometry (Dover Books on Mathematics) to make your own reading is interesting. Your current skill of reading talent is developing when you just like reading. Try to choose very simple book to make you enjoy to read it and mingle the idea about book and looking at especially. It is to be very first opinion for you to like to start a book and study it. Beside that the book Introduction to Projective Geometry (Dover Books on Mathematics) can to be your brand-new friend when you're truly feel alone and confuse in what must you're doing of their time.
