## A Course in Theoretical Physics P. John Shepherd

This book is a comprehensive account of five extended modules covering the key branches of twentieth-century theoretical physics, taught by the author over a period of three decades to students on bachelor and master university degree courses in both physics and theoretical physics.

The modules cover nonrelativistic quantum mechanics, thermal and statistical physics, many-body theory, classical field theory (including special relativity and electromagnetism), and, finally, relativistic quantum mechanics and gauge theories of quark and lepton interactions, all presented in a single, self-contained volume.

In a number of universities, much of the material covered (for example, on Einstein's general theory of relativity, on the BCS theory of superconductivity, and on the Standard Model, including the theory underlying the prediction of the Higgs boson) is taught in postgraduate courses to beginning PhD students.

A distinctive feature of the book is that full, step-by-step mathematical proofs of all essential results are given, enabling a student who has completed a high-school mathematics course and the first year of a university physics degree course to understand and appreciate the derivations of very many of the most important results of twentieth-century theoretical physics.

### **From reader reviews:**

#### **John Solorio:**

Do you have favorite book? Should you have, what is your favorite's book? Guide is very important thing for us to find out everything in the world. Each book has different aim or even goal; it means that publication has different type. Some people feel enjoy to spend their a chance to read a book. They can be reading whatever they acquire because their hobby will be reading a book. Consider the person who don't like examining a book? Sometime, man feel need book if they found difficult problem as well as exercise. Well, probably you will want this A Course in Theoretical Physics.

#### **Alice Walker:**

The book A Course in Theoretical Physics will bring you to definitely the new experience of reading any book. The author style to clarify the idea is very unique. In the event you try to find new book you just read, this book very suited to you. The book A Course in Theoretical Physics is much recommended to you to see. You can also get the e-book from your official web site, so you can more easily to read the book.

#### **Tiffany Zamora:**

Reading a book tends to be new life style in this era globalization. With looking at you can get a lot of information that will give you benefit in your life. With book everyone in this world could share their idea. Textbooks can also inspire a lot of people. Plenty of author can inspire their own reader with their story or maybe their experience. Not only the story that share in the publications. But also they write about advantage about something that you need example. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors these days always try to improve their skill in writing, they also doing some exploration before they write for their book. One of them is this A Course in Theoretical Physics.

#### **Bonnie Pace:**

As a scholar exactly feel bored in order to reading. If their teacher requested them to go to the library as well as to make summary for some reserve, they are complained. Just tiny students that has reading's soul or real their interest. They just do what the teacher want, like asked to go to the library. They go to presently there but nothing reading seriously. Any students feel that reading through is not important, boring as well as can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this A Course in Theoretical Physics can make you feel more interested to read.
