Magnetofluidynamics in Channels and Containers

U. Müller, L. Bühler

Magnetofluidynamics in Channels and Containers U. Müller, L. Bühler

The book deals with the theme of incompressible flows of electrically conducting fluids in hydraulic components. The main content of the book is a result of engineering research associated with the design of liquid metal cooling systems for fusion reactors. The book is well suited to serve as a guide for utilising magnetohydrodynamic means in other engineering disciplines such as in material processing, metallurgical engineering and power engineering.
