This definitive guide to successfully publishing social science research demonstrates that completing a project is only the first phase of research. Dissemination is the second phase, and it requires specific skills and knowledge.

**The Academics' Guide to Publishing:** explains the different ways in which research can be disseminated: in journals, books, reports, the Internet, popular media, and conferences; demonstrates how the structures, practices and procedures involved work - making them easily understood and transparent; and situates research in the larger and changing context of Higher Education.

For postgraduates or academics in the social sciences **The Academics' Guide to Publishing** provides essential guidance on how to secure a job, how to gain tenure, how to survive research assessment exercises, and how to obtain promotion.
