## **Infectious Disease Informatics: Syndromic Surveillance for Public Health and Bio-Defense: 21 (Integrated Series in Information Systems)** Hsinchun Chen, Daniel Zeng, Ping Yan

Computer-based infectious disease surveillance systems are capable of real-time or near real-time detection of serious illnesses and potential bioterrorism agent exposures and represent a major step forward in disease surveillance. Infectious Disease Informatics: Syndromic Surveillance for Public Health and Bio-Defense is an in-depth monograph that analyzes and evaluates the outbreak modeling and detection capabilities of existing surveillance systems under a unified framework, and presents the first book-length coverage of the subject from an informatics-driven perspective.

Individual chapters consider the state of the art, including the facilitation of data collection, sharing and transmission; a focus on various outbreak detection methods; data visualization and information dissemination issues; and system assessment and other policy issues. Eight chapters then report on several real-world case studies, summarizing and comparing eight syndromic surveillance systems, including those that have been adopted by many public health agencies (e.g., RODS and BioSense). The book concludes with a discussion of critical issues and challenges, with a look to future directions.

This book is an excellent source of current information for researchers in public health and IT. Government public health officials and private-sector practitioners in both public health and IT will find the most up-to-date information available, and students from a variety of disciplines, including public health, biostatistics, information systems, computer science, and public administration and policy will get a comprehensive look at the concepts, techniques, and practices of syndromic surveillance.

**From reader reviews:**

**Cheryl Stone:**

Book is to be different per grade. Book for children until finally adult are different content. As we know that book is very important for people. The book Infectious Disease Informatics: Syndromic Surveillance for Public Health and Bio-Defense: 21 (Integrated Series in Information Systems) seemed to be making you to know about other know-how and of course you can take more information. It is extremely advantages for you. The reserve Infectious Disease Informatics: Syndromic Surveillance for Public Health and Bio-Defense: 21 (Integrated Series in Information Systems) is not only giving you a lot more new information but also for being your friend when you sense bored. You can spend your spend time to read your guide. Try to make relationship with the book Infectious Disease Informatics: Syndromic Surveillance for Public Health and Bio-Defense: 21 (Integrated Series in Information Systems). You never truly feel lose out for everything when you read some books.

**Will Cathcart:**

Do you have something that you want such as book? The e-book lovers usually prefer to select book like comic, small story and the biggest an example may be novel. Now, why not attempting Infectious Disease Informatics: Syndromic Surveillance for Public Health and Bio-Defense: 21 (Integrated Series in Information Systems) that give your fun preference will be satisfied by reading this book. Reading addiction all over the world can be said as the way for people to know world considerably better then how they react when it comes to the world. It can't be explained constantly that reading routine only for the geeky person but for all of you who wants to become success person. So , for all of you who want to start examining as your good habit, you may pick Infectious Disease Informatics: Syndromic Surveillance for Public Health and Bio-Defense: 21 (Integrated Series in Information Systems) become your personal starter.

**Stuart Perez:**

Many people spending their moment by playing outside along with friends, fun activity having family or just watching TV the whole day. You can have new activity to pay your whole day by reading through a book. Ugh, ya think reading a book can really hard because you have to bring the book everywhere? It all right you can have the e-book, having everywhere you want in your Cell phone. Like Infectious Disease Informatics: Syndromic Surveillance for Public Health and Bio-Defense: 21 (Integrated Series in Information Systems) which is finding the e-book version. So , why not try out this book? Let's view.

**James Buscher:**

As a student exactly feel bored to help reading. If their teacher asked them to go to the library or make summary for some book, they are complained. Just tiny students that has reading's soul or real their leisure activity. They just do what the trainer want, like asked to go to the library. They go to generally there but

nothing reading seriously. Any students feel that examining is not important, boring and can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this **Infectious Disease Informatics: Syndromic Surveillance for Public Health and Bio-Defense: 21 (Integrated Series in Information Systems)** can make you truly feel more interested to read.
