IPv6 Advanced Protocols Implementation (The Morgan Kaufmann Series in Networking) Qing Li, Jinmei Tatuya, Keiichi Shima

This book is the second installment of a two-volume series on IPv6 and the KAME implementation. This book discusses those protocols that are found in more capable IPv6 devices, are commonly deployed in more complex IPv6 network environments, or are not specific to IPv6 but are extended to support IPv6.

Specifically, this book engages the readers in advanced topics such as routing, multicasting, DNS, DHCPv6, mobility, and security.

This two-volume series covers a wide spectrum of the IPv6 technology, help the readers establish solid and empirical understanding on IPv6 and the KAME reference implementation paralleled by none.

Key Features:

- * Extensive code listings with meticulous line-by-line explanation of rationale and use for KAME snapshot implementations on advanced IPv6 related protocols, including:
 - Unicast and multicast routing and DNS client based on KAME snapshot dated April 2003, which are a base of more recent versions of BSD variants
 - Mobile IPv6 based on KAME snapshot dated July 2004, a predecessor version of the "SHISA" implementation
 - DHCPv6 based on KAME snapshot dated May 2005, a base of the WIDE-DHCPv6 implementation available at SourceForge today
 - * Numerous diagrams and illustrations help in visualizing the implementation
 - * In-depth discussion of the standards provides intrinsic understanding of the specifications
 - * An introduction to the IP security protocols along with the use of the racoon key exchange daemon
 - * Two CD-ROMs filled with the complete KAME IPv6 protocol stack and FreeBSD software
-
- * The only authoritative reference "cookbook" for anyone interested in advanced IPv6 topics and protocols.
 - * Line-by-line walk through of real code helps the reader master IPv6 implementation
 - * Comprehensive in scope, based on a working standard, and thoroughly illustrated to bring the protocols alive.

From reader reviews:

Adrienne McGinnis:

Do you have favorite book? When you have, what is your favorite's book? Book is very important thing for us to understand everything in the world. Each e-book has different aim as well as goal; it means that e-book has different type. Some people really feel enjoy to spend their time and energy to read a book. They are really reading whatever they have because their hobby is usually reading a book. How about the person who don't like looking at a book? Sometime, man feel need book if they found difficult problem or even exercise. Well, probably you will require this IPv6 Advanced Protocols Implementation (The Morgan Kaufmann Series in Networking).

Robert Burke:

Information is provisions for folks to get better life, information nowadays can get by anyone on everywhere. The information can be a expertise or any news even a concern. What people must be consider any time those information which is within the former life are challenging be find than now could be taking seriously which one is appropriate to believe or which one the actual resource are convinced. If you find the unstable resource then you have it as your main information you will have huge disadvantage for you. All of those possibilities will not happen throughout you if you take IPv6 Advanced Protocols Implementation (The Morgan Kaufmann Series in Networking) as your daily resource information.

Victor Brown:

Reading a book to become new life style in this calendar year; every people loves to read a book. When you learn a book you can get a lot of benefit. When you read ebooks, you can improve your knowledge, because book has a lot of information onto it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your research, you can read education books, but if you act like you want to entertain yourself read a fiction books, this kind of us novel, comics, in addition to soon. The IPv6 Advanced Protocols Implementation (The Morgan Kaufmann Series in Networking) provide you with a new experience in reading through a book.

Allen Grimm:

On this era which is the greater man or who has ability in doing something more are more treasured than other. Do you want to become one of it? It is just simple solution to have that. What you should do is just spending your time little but quite enough to experience a look at some books. On the list of books in the top checklist in your reading list is IPv6 Advanced Protocols Implementation (The Morgan Kaufmann Series in Networking). This book which is qualified as The Hungry Slopes can get you closer in growing to be precious person. By looking upwards and review this book you can get many advantages.
