Electromedicine and Biofeedback (Portuguese Edition) Vitor Monteiro

Master's Thesis from the year 2011 in the subject Physical Therapy / Occupational Therapy, grade: -, Atlantic International University (School: Science and Engineering), language: Portugues, abstract: Cada molécula, célula viva do corpo humano e objeto é composto de energia que se manifesta como matéria física. A energia é detectável através de frequências em uma ou mais faixas de radiação no espectro eletromagnético. E essas frequências correspondem aos processos bioquímicos e biológicos no corpo. Com terapias de electromedicina, a cura é alcançada ao trabalhar com a radiação eletromagnética (emissões), com a energia que se forma, e que é emitida para a matéria física.

O estudo dos efeitos terapêuticos dos campos magnéticos levantou a possibilidade do emprego e produção, através de correntes de baixa frequência, em contraste com a alta-frequência que provoca um campo magnético muito mais intenso do que a eléctrica. Os primeiros testes foram muito encorajadores, e experiências biológicas funcionaram logo na aplicação clínica.

No campo crescente da "medicina energética" é bem sabido que o nosso universo é criado por meio de padrões de frequência. A ciência agora está documentando o que os místicos de muitas tradições já sabiam. Tudo o que existe no plano físico, mental, emocional e espiritual tem uma base vibratória, se considerarmos que os elétrons estão sempre em movimento e vibração. Todas as intervenções de cura vai influenciar o corpo de alguma forma e alterar a sua frequência de ressonância. A cura tem sido frequentemente afectadas por modalidades, tais como som, luz, musicoterapia e várias outras técnicas de medicina da energia que alteram os padrões de frequência de um indivíduo. Toda a matéria, incluindo plantas aromáticas, produtos farmacêuticos, alimentos e até mesmo vitaminas, minerais e outros nutrientes podem ser examinados a partir de uma perspectiva de frequência que pode explicar os seus efeitos biológicos.

A Biorressonância e o Biofeedback são as disciplinas desta medicina do futuro e baseiam-se em terapias baseadas nos campos de informação e energia, que organizam o funcionamento celular, e que correspondem segundo os seus teóricos aos campos electromagnéticos, que representam os padrões da actividade bioquímica. Chegamos assim a uma autêntica Medicina da Informação. Quando o campo magnético está em ordem, o corpo está saudável. A Ressonância é assim o mecanismo Biológico e físico através do qual as frequências induzidas afectam sistemas físicos desequilibrados.
