Over the past few years there has been a surge of interest in discussing how business schools help students learn about “anti corruption”—how it develops and is directly linked to the practices of businesses today.

The increased interest in knowing what exactly constitutes anti corruption practices, and how such practices can become meaningfully integrated in the organizational life of companies, is where this book comes to life

To help you develop an empirical and theoretical platform for rethinking business school curricula, or

strategize within your own company (with a specific view to understanding and meaningfully confronting the challenges of corruption), this book will...

- offer examples of new tools, teaching methods, and case studies for anti corruption teaching;
- explore and discuss how particular approaches, such as Giving Voice to Values, may be used worldwide for teaching anticorruption; and
- explore and discuss how curricula can be streamlined and rejuvenated in order to ensure a high level of integrity in the worlds of business
